Task 1

For a class called "Computers in Society", the professor has given you the assignment to write a 5-page essay on some aspect of **virtual reality**. Having a good grade for this essay is critical for passing the course. The essay is due in a week, but you have yet to decide on an exact topic. In a deliverable due tomorrow, you have to define your topic, a specific question about the topic and a list of sources.

Objective:
Prepare a *list of at least 3 ideas for a topic* to write about in the context of **virtual reality**. They should cover many different aspects of the topic, and unusual or provocative ideas are good. Search the web using the SearchAssist system to find out what information is available. Write down your ideas for topics in the text field below. Bookmark any webpages you encounter via the SearchAssist system which are useful for writing on these topics (utilizing the *"save result"* feature).
